

# Charity Event on 1<sup>st</sup> and 2<sup>nd</sup> August 2015 For Dolma Foundation and NCC Research Fund

In April of this year, Nepal had the worst disaster recorded in the country's history - a 7.8 magnitude earthquake struck Kathmandu, its capital, and the surrounding area that caused the loss of thousands of lives. Many more lost their homes. What followed were a series of aftershocks, and many minor earthquakes that continued to cripple Nepal, which lasted till May.

All around the world, as we watched, humanity efforts poured in. We, at RT LLP, helped willingly and with pride when we were approached by the Dolma Foundation. It was a very humbling experience and opportunity.

RT LLP participated in a fundraising event organised by Chemistry Concept for Dolma Foundation and NCC Research Funds on 1<sup>st</sup> and 2<sup>nd</sup> August 2015. It was held outside Mandarin Gallery along Orchard Road. The fund raised will be used to purchase monsoon shelters for the Nepal victims. Also, portion of the collection went to NCC Research Fund in Singapore. Our staff, regardless of hierarchy, volunteered their time to help raise funds for the victims of the Nepal disaster.

Despite the hot sun, pedestrians donated generously by having their photos taken when they sat on well-maintained Vintage Vespa kindly loaned by their owners.

We had keen interest and participation from both locals and tourists, who were thrilled to have their photos taken with the nostalgic Vespas (with sidecars) for a small donation.

As part of the Singapore accounting profession, we were honoured to contribute, our time and effort, and be the official auditor for the event on a pro bono basis. It was a heart-warming and enjoyable event and we look forward to participating in the next Charity drive – pro bono of course !
